107. Natureclan: Hidden Shadows

Notice

The following command game is closed. It is only left up to relive the memories. In the future I may or may not start it up again but until then, I won't be accepting any more characters.

Information

This is a new warrior clan, Natureclan. And YOU will get to join this newly formed clan.

RULES:
*Please don't use any bad language.
*There can be 2 medicine cats and one medicine cat apprentice at most
*I will be the leader because I don't want any arguments over who wil become leader
*I will only be accepting 25 characters into the game and after 25 you will be put on the waiting list
*I want to try to have an even amount of toms and she-cats so more characters can mate
*there will be no queens plz until we get further into the game so you have time to meet the other cats first

For those who have not done one of these, this is an interactive warriors game. You will be able to meet other warriors fans on wattpad, ^tag at least three people please^, and it will be like you are in an actual clan except for what you see around you.

Try to follow all of the rules, meet new warrior cats, and most importantly, have fun!

Before we start...

Before the game starts, these are the commands that you will be using.

/hunt with... (your characters name)- This means that you are starting a hunting patrol and anyone can join it. A patrol is at its max number of cats when there are 5 cats on the patrol. The amount of prey caught depends on the hunting skill level of each cat on the patrol.

/hunt alone (your character's name)- This means that you want to hunt by yourself and you aren't on a patrol.

/patrol with... (your character's name)- This means that you are starting a border patrol. Anyone is open to join but the max amount of cats allowed on the patrol is 5. The border strength increases whenever there is a patrol.

/forage with... (your character's name)- This is when medicine cats forage for herbs. You need herbs to heal cats!

/train fsl with... (your character's name)- This command is for medicine cats and medicine cat apprentices ONLY. When you train with someone that has a higher level than you, then your level increases by 1/2. The higher levels, the more herbs you can collect.

/train healing skill level with... (your character's name)- This command levels up Medicine cats' and medicine cat apprentices' healing skill level. The higher your hsl is, the more severely injured or sick cats you are able to cure.

/heal (cat's name) (your character's name)- This command is when a medicine cat or medicine cat apprentice heals a sick or injured cat.

/train bsl (or) hunting skill level with (mentor's name) (your character's name)- This command is only for apprentices. This

means that they are training their battle skill level with their mentor. After training, your bsl will increase by 1/2.

/train bsl (or) hunting skill level with... (your character's name)- This command is for warriors and apprentices. This means that you want someone to train battle skill level with you. If their level is higher than yours, then your bsl will increase by 1/2.

/bond with... (your character's name)- This is when you want to bond with anyone. You can bond with anyone, it doesn't just have to be the cat you want to be mates with. It could be your parents, littermate, or the cat you want to be your mate. Bonding doesn't use any energy.

/bond with (character you want to bond with) (your character's name)- This is basically the same command as the one above except this means that you want to bond with a certain cat. Bonding doesn't use any energy.

/play (or) /play with... (your character's name)- This command is only for queens and kits. They can play altogether or with different kits and queens. The reason is because the only thing kits can do is play, roleplay, and bond with their littermates or mother.

/don't eat (your character's name)- This is when you eat last in the day. This is best to use when there is less prey, because it makes you hungry, but it also preserves some of the prey.

Energy: (You use one energy when you use a command except for bonding which doesn't use and energy.)

Adoption (CLOSED)

This is the adoption center! When a person is inactive for a certain amount of days and doesn't tell me, then their cat(s) will come here.

This is where you can adopt a cat and use it instead of making your own and waiting on the waiting list.

You *must* PM me the password and if you can't PM people then send it to me on my message board. Without the password then you can't adopt a cat.

If you see that you're cat is on here, then you can adopt your cat to own it again.

If the cat you adopt is a kit or apprentice, you have to choose the last part of their name as a warrior that's not that persons OC.

The cats below were rogues but we need more toms in the clan. If you adopt one of these cats you can change it to a warrior name if you want.

CLAN NEWS

There was a new cat found on a border patrol yesterday! Her name is Rowan and she has decided not to change her name. In the Roleplays, some cat can show Rowan around camp!

It is the half-moon tonight! Either one or two of the medicine cats must travel to the moonstone by using the command */travel to moonstone.* If you use this command though, you won't be able to do anything else until you return. (The next day.) Hazelpaw must also travel to the Moonstone tonight to be accepted as a medicine cat apprentice by Starclan!

Don't forget to use you energy for hunting and patrolling. You also might want to train.

CLAN NEWS

Today is the half moon. One of the medicine cats must travel there. They will use the command */travel to moonstone.* Rowanpaw must also travel to the moonstone today so he can be accepted as a medicine cat by starclan.

Bluejaykit, Nightkit, Featherkit, and Shadowkit are all old enough to become apprentices, but they don't have enough plays. That is why they can play as many times as they want today.

WarriorCats09

The energy has changed! All warriors/med cats now have 3 energy, the leader has 4, and kits and apprentices have the same!

There is a flood! Use the command */swim away* to survive! The kits don't have to use this command and will be carried by the warriors, but the owners of the kits must comment that they are active or their cat will die! Using this command is 2 energy and saving a cat is 1 energy!

Please tell me if I missed anything!

CLAN NEWS

All of the kits (except the newborns) can rank up!

All of the apprentices can rank up! (Even the medicine cats!)

The energy has changed! All warriors/med cats now have 3 energy, the leader has 4, and kits and apprentices have the same!

There was a flood yesterday and Lillywing, Cloverpool, Shadowsnow, Leopardshine, Birdfang, Mossclaw, and Pinepaw died in the flood!

There is going to be a period of peace! This is to let cats train and get ready for the Dark Forest and you won't need to patrol!

Please tell me if I missed anything!

CLAN NEWS

Silverpaw, Crowkit, Rushkit, Robinkit and Fawnpaw can rank up!

The energy has changed! All warriors/med cats now have 3 energy, the leader has 4, and kits and apprentices have the same!

There is going to be a period of peace! This is to let cats train and get ready for the Dark Forest and you won't need to patrol!

The Dark Forest battle is getting dangerously close! Keep training because they could attack any day now!

Maplemist has maxed out both of her skills!

Please tell me if I missed anything!

CLAN NEWS

Silverpaw, Crowkit, Rushkit, Robinkit and Fawnpaw can rank up!

The dark forest is attacking! I am pretty sure that most of the fight will happen in roleplay form but I will put a chain for if you are attacking or not. I think it would be best to roleplay the fight since I don't know everyone's dark forest characters and depending on how the fight goes, I will say if you are injured, slightly injured, or severely injured. There will be something in the comments and I will put something for the dark forest cats. Each person can put their dark forest characters under the comment but please in separate comments because I will be deleting the cats that get defeated.

Please tell me if I missed anything!

CLAN NEWS

Fawnpaw can rank up!

Silverpaw ranked up to Silverfeather!

🐾

Bitterkit, Opalkit, Leopardkit, Lionkit, Flamekit, Blazekit, Snowkit and Marblekit ranked up! Their mentors are Rowanstrike, (Brindleshine) Luckystep, (Sandleaf) Snowfeather, (SkyfireofLostclan) Cloudfrost, Emberclaw, (Degal_Heartfang) Rowan, (Aspen_the_wolf) Berryshade (Bluemoon12251) and Moonshadow! (Brindleshine)

🐾

Twolegs are exploring the territory! They captured Snowpaw and put traps on the territory! If you go out with a patrol there is 25% chance of getting trapped in a cage and captured! If you go out alone there is a 50% chance!

🐾

Silkstar and Moonshadow need to decide what to do. Do you try and rescue Snowpaw? Try to find out what the twolegs are doing? Or are you going to make the decision to evacuate the camp? (You could do other things these are just examples)

🐾

Moonshadow, Shadedleaf, Fawnflight, and Lionheart are hungry! (No effect)

🐾

There is a new command! Use the command */share prey with...* To save prey! If you use this command two days in a row you are hungry, three days you are starving, and four days in a row you die!

🐾

R

owan is expecting kits! They will be born next moon!

🐾

Since Rowan is expecting kits, Blazepaw's mentor is now Jaysong!

CLAN NEWS

Fawnpaw can rank up!

Silverpaw ranked up to Silverfeather!

Twolegs are exploring the territory! They captured Snowpaw, Lionheart, Moonshadow, Domino, Pixie and Rowanstrike and put traps on the territory! If you go out with a patrol there is 25% chance of getting trapped in a cage and captured! If you go out alone there is a 50% chance!

The clan need to decide together what to do. Do you try and rescue your clanmates? Try to find out what the twolegs are doing? Or are you going to make the decision to evacuate the camp? (You could do other things these are just examples)

There is a new command! Use the command */share prey with...* To save prey! If you use this command two days in a row you are hungry, three days you are starving, and four days in a row you die!

Rowan gave birth to Pineleaf's kits! They are Lostkit, (SkyfireofLostclan) Lynxkit, (shxdedskies-) Saltykit, (blindTamarin) Firekit (HollyIsKawaii) and Sparkkit! (HateIsCool)

Since Rowan is expecting kits, Blazepaw's mentor is now Jaysong! shxdedskies-

16 cats are hungry!

Please tell me if I missed anything!

Luckystep and Lightstreak rescued the captured cats and escaped! The clan has evacuated the camp and are at the edge of the territory. **The journey begins today!**

So today the journey starts and things will be a little bit different. The apprentices will still get to train but they won't become full warriors until the clan reaches their new home. The kit won't rank up to apprentices either until the clan reaches their new home.

There will be no more patrolling. Instead there is a new command: */scout ahead.* At least three warriors should scout ahead each day to see if there are any dangers ahead.

There is still hunting but it will be harder. So that means each cat will collect -1 prey! I suggest only level 5-7 cats hunting and others scouting ahead or training.

Since Rowan is nursing kits, Blazepaw's mentor is now Jaysong!
shxdedskies-

26 cats are hungry!

Jaysong and Sleet are hungry! (No effect)

Important! To continue the journey then use the command /*continue journey*. If you don't then your cat will get left behind

in the second group. If your cat gets left behind from the second group then that character leaves the game! Tell me if you are going to leave beforehand so your character(s) won't get left behind!

Please tell me if I missed anything!

Since Rowan is nursing kits, Blazepaw's mentor is now Jaysong! shxdedskies-

Fawnflight, Hawkfeather, Silverfeather, Amberblaze, Stormpaw, Opalpaw, Leopardpaw, Firekit, and Saltykit got left behind and are now in group 2! Use the command */catch up* to catch up to group 1!

Jaysong and Sleet are starving! (-2 energy)

Important! To continue the journey then use the command */ *continue journey*. If you don't then your cat will get left behind in the second group. If your cat gets left behind from the second group then that character leaves the game! Tell me if you are going to leave beforehand so your character(s) won't

get left behind!

A new cat has joined the clan and his name is Sky! He is traveling with the clan right now.

While scouting ahead, a patrol found a fork in the road! There are three paths: One leads to and open field with hills, on leads to a dense forest, and the third leads to mountains. Sky says that he has been traveling all his life and knows this area well. He says the mountains are the best path, but can you trust him? The clan will vote which path to take!

Please tell me if I missed anything!

CLAN NEWS

So today the journey starts and things will be a little bit different. The apprentices will still get to train but they won't become full warriors until the clan reaches their new home. The kits won't rank up to apprentices either until the clan reaches their new home.

There will be no more patrolling. Instead there is a new command: */scout ahead.* At least three warriors should scout ahead each day to see if there are any dangers ahead.

There is still hunting but it will be harder. So that means each cat will collect -1 prey! I suggest only level 5-7 cats hunting and others scouting ahead or training.

Since Rowan is nursing kits, Blazepaw's mentor is now Jaysong!
shxdedskies-

Amberblaze, Stormpaw, Opalpaw, Leopardpaw and Saltykit got left behind and are now out of the game!

G

hoststone, Bitterpaw, Bearclaw, Snowfeather, Lionheart, Phoenixfeather and Sparkkit got left behind and are in group 2! Use the command /catch up to catch up to group 1 or you will get left behind and be out of the game!

Fawnflight, Hawkfeather, Firekit, and Silverfeather caught up to group 1!

Jaysong and Sleet are starving! (-2 energy) If they don't eat today they will die!

Important! To continue the journey then use the command / *continue journey*. If you don't then your cat will get left behind in the second group. If your cat gets left behind from the second group then that character leaves the game! Tell me if you are going to leave beforehand so your character(s) won't get left behind!

A new cat has joined the clan and his name is Sky! He is traveling with the clan right now.

The clan has decided to take the mountain path!

Please tell me if I missed anything!

So today the journey starts and things will be a little bit different. The apprentices will still get to train but they won't become full warriors until the clan reaches their new home. The kits won't rank up to apprentices either until the clan reaches their new home.

There will be no more patrolling. Instead there is a new command: */scout ahead.* At least three warriors should scout ahead each day to see if there are any dangers ahead.

🐾

There is still hunting but it will be harder. So that means each cat will collect -1 prey! I suggest only level 5-7 cats hunting and others scouting ahead or training.

🐾

Since Rowan is nursing kits, Blazepaw's mentor is now Jaysong!
shxdedskies-

🐾

Hawkfeather, Jaysong and Sleet are now in group 2! Use the command /catch up to catch up to group 1 or you will get left behind and be out of the game!

Ghoststone, Bitterpaw, Snowfeather and Phoenixfeather got left behind and are now out of the game!

🐾

Silverfeather caught up to group 1!

🐾

Emberclaw is hungry!

🐾

Important! To continue the journey then use the command / *continue journey*. If you don't then your cat will get left behind in the second group. If your cat gets left behind from the second group then that character leaves the game! Tell me if you are going to leave beforehand so your character(s) won't get left behind!

🐾

A new cat has joined the clan and his name is Sky! He is traveling with the clan right now.

🐾

Something seems off about the tribe...Do you want to stay or try to leave? What the clan decides could result in a battle, you've been warned.

🐾

Please tell me if I missed anything!

CLAN NEWS

So today the journey starts and things will be a little bit different. The apprentices will still get to train but they won't become full warriors until the clan reaches their new home. The kits won't rank up to apprentices either until the clan reaches their new home.

There will be no more patrolling. Instead there is a new command: */scout ahead.* At least three warriors should scout ahead each day to see if there are any dangers ahead.

There is still hunting but it will be harder. So that means each cat will collect -1 prey! I suggest only level 5-7 cats hunting and others scouting ahead or training.

30 cats are hungry!

Silkstar, Blazepaw, and Rowan have caught whitecough!

Important! To continue the journey then use the command / *continue journey.* If you don't then your cat will get left behind in the second group. If your cat gets left behind from the second group then that character leaves the game! Tell me if you are going to leave beforehand so your character(s) won't get left behind!

The clan won the battle against the tribe! It came with a price, though. Dawnwater, Hawkfeather, Silverfeather, Shadowsnow, Jaysong, Shadedleaf, Sleet, Lynxkit, and Firekit were lost in the battle!

Sky was lost during the battle! (See my Random Book for death scene.) He is no longer with the clan!

Sand Breeze is now traveling with the clan! Her mentor is Pineleaf!

End

I am sorry to say this command game has come to an end. Basically the main plot has been tied up and this was barely alive near the end so I've decided to just end it.

I will leave this up for people to relive memories, and I want to do that too. The clan arrived at their new home where their new beginning is.

I may or may not make a sequel in the future. If I do, none of the original cats will be in it because so many people have left this. Instead I would be welcoming brand new cats as basically the new era of Natureclan.

We had a good one.

Natureclan: Hidden Shadows

The clan has thrived since arriving at their new home.

Seasons and almost two generations have passed since the founders of Natureclan has walked the forest.

This new generation of cats has grown used to no major conflict, any kind being only the terror of kit tales of the clan's early days.

Until something unexpected approaches Natureclan , and not even Starclan can help them.

Natureclan must not give in, if they are to survive.

Hello OGs!

So . . . yeah I'm going (to try) to make a next gen of Natureclan but I guess it'll be a bit darker(?)

There will be murder, mystery, secrets, lies, etc. New cats (to the clan) too!

Keep in mind all of the OG cats are dead. That being said, you will be able to roleplay them in Starclan. (And maybe even have one or two deliver a prophecy/talk in dreams to med cats?)

I am hoping this works out I really want it to. I am not excluding anyone so people from the original Natureclan and anyone else will be able to join.

One last thing - this will be a roleplay, not a command game. This is the best way to carry out the plot and everything also it's a better way to evolve relationships.

It would mean so much to me if the people who saw this could tag/

spread the news of this. I really want to start this with enough people.

Thank you so much to those who want to continue Natureclan's journey with me. Thank you so much to those who want to help spread the word and those new who want to join.

Now, let's see if this will work!

PS. Here's a few ideas for the cover if anyone wants to try making one?
